

Boole Server named Best Data-Loss Prevention Solution and Best Encryption Solution Finalist in SC Magazine Awards 2012 Europe

Milano, February 2nd, 2012. Boole Server, has been named for the second consecutive year a SC Awards finalist in 2 categories: **Best Data-Loss Prevention Solution** and the **Best Encryption Solution**. Boole Server's revolutionary approach to protecting valuable information and data, is defining the market for Data Centric Security and has been recognised with these nominations in, what Paul Fisher, SC Magazine UK editor, described as, "a record-breaking year for entries for the awards... this is represented in the quality of the nominees".

Boole Server is a Unified Data Centric Protection solution that enables organisations to protect and share sensitive data (files, emails and text) without losing control of them. Whereas old-style security focuses on securing storage, transmission, end points & perimeters, Boole Server secures the data itself, wherever it is and however it is used.

Leading the field in data-centric security, Boole Server is used by leading international organisations to securely protect and share data, even when that data is sent to 3rd parties. Organisations from fashion houses, through insurance, finance, law enforcement, public sector bodies to manufacturers use Boole Server to keep their Intellectual Property safe and their sensitive data secure.

The [SC Awards Europe](#) are widely recognised as the most coveted and prestigious awards for the European information security industry. The SC Awards honour professionals working to secure enterprises and the vendor and channel communities that deliver innovative security technologies. The awards process will once again culminate in a glittering night in central London where the bigger than ever SC Awards Europe 2012 will be announced. The awards coincide with the annual Information Security Show, Infosec, taking place at Earls Court London from 24th to 26st April 2012, where Boole Server will be exhibiting on stand G62.

"We are honoured to be included amongst the finalists of the SC Awards for the second consecutive year", says Valerio Pastore, Chairman of Boole Server, "We are committed to helping our customers reduce the costs and complexities in keeping their confidential information safe, while allowing them to use and share it effectively. Boole Server is making great strides in leading the market for flexible, effective data protection, being selected as a finalist is a welcome recognition of our efforts".

About SC Magazine
